FENIL MODI

Full-Stack Software Engineer

+91 6355952772 | Fenilmodi1811@gmail.com | Surat, Gujarat, India | www.linkedin.com/in/fenil-modi-363271401

PROFILE SUMMARY

- Full-Stack Software Engineer with 2+ years of experience delivering scalable, production-grade applications across the complete SDLC — from requirement analysis and system design through development, testing, deployment, and maintenance.
- Specializes in Node.js, Next.js, and NestJS, with strong command of backend architecture, RESTful API design, authentication, and database management for high-performance web and mobile platforms.
- Track record of shipping AI-integrated SaaS products, fintech platforms, and telemedicine systems, consistently prioritizing performance, security, and clean, maintainable code.
- Effective cross-functional collaborator — partners with product, design, and engineering teams through requirement discussions, code reviews, and deployment cycles to ship reliable software on schedule.

AREAS OF EXPERTISE

- Full-Stack Application Development & Architecture
- Requirement Analysis & Technical Documentation
- API Design, Integration & Third-Party Authentication
- Performance Optimization & Defect Resolution
- Agile Delivery, Code Review & Cross-Team Collaboration
- End-to-End SDLC Ownership: Design → Development → Testing → Deployment

TECHNICAL SKILLS

Languages & Frameworks: React.js, Next.js, Flutter, Node.js, Express.js, NestJS, Prisma ORM, TypeScript, JavaScript (ES6+), Dart, HTML, CSS

Databases: MongoDB, MySQL, PostgreSQL, SQLite

Cloud & Backend Services: Firebase, Supabase, AWS, Redis, Redpanda / Kafka

Tools & Platforms: Git/GitHub/GitLab, Trello, Android Studio, MySQL Workbench, Visual Studio Code

Core Strengths: Team Leadership, Analytical & Critical Thinking, Problem-Solving, Communication, Time Management

WORK EXPERIENCE

Software Engineer — Paroksya, Surat, India

June 2024 – Present

Bhram AI — *Full-Stack Developer (Next.js Admin Panel) — Current*

- Engineering the Next.js admin panel for Bhram, a live AR-based social discovery app on Google Play, enabling content moderation and platform management.
- Resolved critical Angular front-end rendering defects on post-display screens, improving UI reliability across the platform.
- Architecting a Redpanda + Kafka event-streaming pipeline to support scalable, real-time data processing.

J2X → Dealowl (dealowl.co) — *Full-Stack Developer (React, Node.js, TypeScript)*

- Owned full-stack development end-to-end as sole engineer, leading the platform's rebrand and relaunch from J2X to Dealowl.
- Designed and shipped two new deal types — Fund Placement and Term Sheet — expanding the platform's core deal-structuring capabilities.
- Built a granular, role-based permission system for the admin dashboard to strengthen access control.
- Implemented Open Graph metadata to enable rich-preview sharing of company and term sheet pages across social platforms.
- Delivered term sheet subscription functionality and resolved recurring UI state issues, improving overall platform stability.

AI Website Audit Tool — *Full-Stack Developer (Node.js & Next.js)*

- Architected and shipped an AI-powered SaaS audit tool for SEO, UX/UI, performance, and CRO analysis, built on Next.js, Node.js, and PostgreSQL.
- Integrated GPT-4o, Claude, Lighthouse, and custom scrapers, cutting report generation time to under 90 seconds and reducing AI operating costs by 76%.
- Implemented secure JWT-based authentication, Redis caching, GDPR compliance checks, and exportable/shareable reporting.

Silly Nutrition (sillynutrition.com) — *Full-Stack Developer (Next.js & Supabase)*

- Took over a stalled project and set up the complete product flow end-to-end, from user questionnaires through to final report generation.
- Integrated the Claude API with structured prompts to process questionnaire responses and generate the final reports.
- Integrated Stripe payments for secure checkout, built on Next.js with Supabase as the real-time database.

lovingloyalty — LLPOS System (Point of Sale) — *Frontend Developer (React) | REST API Integration*

- Led the migration of a legacy POS system from vanilla JS to React, improving maintainability and UI consistency across the platform.
- Built cashier, table management, and multi-order-type workflows spanning Dine-In, Takeaway, and Delivery.
- Integrated REST APIs and managed complex application state with React Hooks, ensuring responsive tablet and desktop support.

TIDOS — Telemedicine Integrated Digital Operating System — *Full-Stack Developer (React & NestJS)*

- Built a cross-border telemedicine platform using React and NestJS, supporting dual-doctor workflows and compliant prescription issuance.
- Integrated IoT devices, AI-based health scoring, real-time video (Agora), and payments (Stripe).
- Implemented JWT authentication, RBAC, row-level security, and GDPR/PIPEDA-ready privacy controls with automated CI/CD.

Globpey — *Full-Stack Developer (Node.js & Flutter)*

- Engineered secure wallet-based money transfers and SilaMoney webhook integrations using Flutter and Node.js.
- Implemented biometric authentication and ACH/KYC tracking, improving mobile reliability and regulatory compliance.

The OnMe App — *Lead Flutter Developer (Mobile & Backend Integration)*

- Led development of 90% of a Flutter e-commerce app with gifting workflows, shipped for iOS and Android.
- Integrated Stripe payments, webhooks, and Node.js APIs, ensuring reliable cart and order synchronization.

Flutter AI Spatial Analyzer — *Flutter Developer*

- Built an AR/AI-powered Flutter app for object measurement and pose detection using ARCore, ARKit, and ML Kit.
- Optimized the real-time inference pipeline to sustain 60 FPS during live AI processing.

MitramCares — *Flutter Developer*

- Built a voice-first Flutter app using STT/TTS and GetX, focused on accessibility-driven user experiences.
- Implemented real-time reminders, WebSocket-based updates, and social engagement features.

Intern — LogWinTech Infotech, Surat, India

January 2024 – June 2024

HRMS (Human Resource Management System) — *Node.js Developer [REST APIs Development] — 5 months*

- Developed Node.js REST APIs for an HRMS platform covering attendance tracking and employee management.
- Implemented RBAC and optimized TypeORM queries, improving query performance and schema scalability.

EDUCATION

- MCA — Sarvajanik College of Engineering and Technology | CGPA: 8.56 | Jun 2022 – Jul 2024
- BCA — Veer Narmad South Gujarat University | CGPA: 8.00 | Jul 2019 – Feb 2022
- HSC — Gurukul Vidyapith N V Dhamanwala School
